

The Logistics and Supply Chain Management Value Added Program offers 30 hours of industrial-oriented classes, providing participants with practical insights and skills essential for success in the dynamic field of logistics and supply chain management. Here's an overview of what the program entails:

**Industry-Relevant Curriculum:** The program curriculum is carefully designed to cover key topics and concepts relevant to the logistics and supply chain industry. Participants will gain a comprehensive understanding of logistics processes, supply chain dynamics, inventory management, transportation, warehousing, and distribution.

**Hands-On Learning:** Through industrial-oriented classes, participants will engage in hands-on learning experiences that simulate real-world logistics and supply chain scenarios. This practical approach allows participants to apply theoretical knowledge to solve practical challenges commonly encountered in the industry.

**Expert Instruction:** Classes are led by experienced industry professionals who bring a wealth of knowledge and insights to the program. Participants will benefit from expert instruction, gaining valuable industry perspectives and best practices directly from professionals working in the field.

**Case Studies and Workshops:** The program incorporates case studies, workshops, and interactive exercises to reinforce learning and foster critical thinking skills. Participants will analyze real-life logistics and supply chain case studies, collaborate with peers, and develop innovative solutions to industry-related challenges.

**Networking Opportunities:** Participants will have the opportunity to network with industry professionals, guest speakers, and fellow participants, allowing them to build valuable connections within the logistics and supply chain community. Networking opportunities may include industry events, guest lectures, and networking sessions.

**Certification:** Upon successful completion of the program, participants may receive a certification or a certificate of completion, recognizing their achievement and demonstrating their readiness to excel in the field of logistics and supply chain management.

Overall, the Logistics and Supply Chain Value Added Program offers a comprehensive and industry-focused learning experience, equipping participants with the knowledge, skills, and

practical insights needed to succeed in the fast-paced world of logistics and supply chain management.
